Kolkata, West Bengal • +91 9717060310 • binayakmohanta3124@gmail.com • [Linkedin](#) • [Github](#)

PROFESSIONAL SUMMARY

Software Developer with internship experience delivering production software, plus full-stack and applied-ML projects taken from build to live deployment. Strong in Python, Java, JavaScript and SQL, with a solid foundation in Data Structures, OOP, and system design.

TECHNICAL SKILLS

Languages & Tools: Python, Java, JavaScript, C/C++, SQL, HTML/CSS, Bash

Frameworks & Platforms: React, Node.js, Express, Socket.IO, Streamlit, Google Earth Engine

AI & ML: Machine Learning, Feature Engineering, SHAP Explainability, Predictive Modeling

Databases & Tools: MongoDB, MySQL, Git, GitHub, VS Code, Google Colab

EXPERIENCE

Hindustan Aeronautics Limited (HAL) — Developer Intern *Dec 2025 – Jan 2026 | Barrackpore, Kolkata*

- Built a web portal for the HR department that streamlined internal workflows and centralized data access for the team.
- Ensured compatibility with the organization's legacy hardware and software, working within the real infrastructure constraints of a defence PSU.

IEEE GRSS SRM Student Chapter — Research Team Member

Oct 2024 – Feb 2025 | SRM IST

- Conducted research in geoscience and remote sensing under the IEEE GRSS chapter, working with satellite and geospatial data.

Aaruush — Committee Head

Aug 2024 – Present | SRM IST

- Led a committee running workshops on business, entrepreneurship and logical thinking at SRM's flagship fest, Aaruush.

PROJECTS

Treasure Hunt App | React, Node.js, Express, Socket.IO, MongoDB | [Link](#)

- Built and deployed a full-stack, real-time multiplayer treasure-hunt game, with a React frontend and a Node.js/Express backend communicating over Socket.IO WebSockets.
- Implemented QR-code-based clue validation and live team progress tracking, backed by MongoDB with game data synced from Google Sheets, deployed on Vercel.

YieldSense – AI-Based Crop Yield Prediction | Python, AI/ML, Google Earth Engine, SHAP | [Link](#)

- Built an end-to-end ML pipeline integrating Sentinel-1/2 satellite imagery, CHIRPS precipitation, and ERA5 climate data via Google Earth Engine to predict crop yields, achieving $R^2 \approx 0.85$.
- Applied SHAP explainability to surface key agronomic drivers (NDVI, rainfall) and delivered predictions through an interactive Streamlit dashboard with yield maps and feature insights.

EDUCATION

SRM INSTITUTE OF SCIENCE AND TECHNOLOGY

BTech in Computer Science and Engineering

CGPA : 8.8/10 (Till 6th Semester)

August 2023 - May 2027

ACHIEVEMENTS & CERTIFICATIONS

- **Competitions:** Won Best Project at TeckNow 2023–24 (Dept. of Physics & Nanotechnology, SRM). Won 1st Prize at Creative Ingenuity'23 (Dept. of Mechanical Engineering, SRM).
- **Certifications:** NPTEL Java Programming, NPTEL Machine Learning, SAP Implementation Consultant - End-to-End Business Processes, INTEL Unnati Intel - Get Started With Generative AI.
- **Competitive Coding:** Solved 70+ problems on HackerRank, active participant on CodeChef.
- **Languages:** English (Professional), Hindi (Native), Bengali (Native).
