

BINAYAK MOHANTA

Kolkata, West Bengal • +91 9717060310 • binayakmohanta3124@gmail.com • [Linkedin](#) • [Github](#) • [Portfolio](#)

PROFESSIONAL SUMMARY

Data Analyst and Applied ML Engineer with strong foundations in Python, SQL, Machine Learning, and Data Analytics. Solid understanding of Object-Oriented Programming, Computer Networks, Software Engineering and Project Management, with a focus on building data-driven solutions. Interested in applying analytical thinking and machine learning to solve real-world problems.

TECHNICAL SKILLS

Languages & Tools: C/C++, Java, Python, SQL, Bash, Flask, Fast API

Data Analytics: Power BI, Excel, Data Analysis, Data Visualization, Exploratory Data Analysis, Pandas, NumPy

AI & ML: Machine Learning, Feature Engineering, Predictive Modelling, SHAP Explainability

Databases and Platforms: Oracle, MySQL, MongoDB, Google Earth Engine, Google Colab, Github

Soft Skills: Leadership, Event Management, Research, Stakeholder Engagement, Public Speaking

EXPERIENCE

Hindustan Aeronautics Limited (HAL) — Developer Intern *Dec 2025 – Jan 2026 | Barrackpore, Kolkata*

- Engineered a centralized HR web portal using ASP, Python, and Oracle, streamlining internal workflows and accelerating organizational data access.
- Architected automated data pipelines using Python and optimized Oracle database queries, ensuring 100% system compatibility within legacy infrastructure.

Aaruush — Committee Head

Aug 2024 – July 2026 | SRM IST

- Led workshops on Business, Entrepreneurship, and Logical Thinking, coordinating teams and event operations.
- Managed stakeholder communication, planning, and execution across multiple activities at SRM's flagship fest.

PROJECTS

OmniStyle — Customer Analytics Platform | Python, Pandas, NumPy, MongoDB, MySQL, Power BI | [Link](#)

- Built an end-to-end analytics platform to analyze customer behavior, sales performance, and loyalty trends using Python, MongoDB, and SQL.
- Developed Power BI dashboards and deployed machine learning algorithms for customer segmentation and churn prediction, identifying key retention drivers and generating actionable business insights.

YieldSense – AI-Based Crop Yield Prediction | Python, AI/ML, Google Earth Engine, SHAP | [Link](#)

- Built an end-to-end ML pipeline integrating Sentinel-1/2 satellite imagery, CHIRPS precipitation, and ERA5 climate data via Google Earth Engine to predict crop yields, achieving $R^2 \approx 0.85$.
- Performed advanced feature engineering and applied SHAP explainability to uncover critical agronomic drivers (NDVI, rainfall), translating complex predictive models into interpretable agricultural insights.

EDUCATION

SRM INSTITUTE OF SCIENCE AND TECHNOLOGY

BTech in Computer Science and Engineering

CGPA : 8.8/10 (Till 6th Semester)

August 2023 - May 2027

CERTIFICATIONS

- Competitions:** Won Best Project at TeckNow 2023–24 (Dept. of Physics & Nanotechnology, SRM). Won 1st Prize at Creative Ingenuity'23 (Dept. of Mechanical Engineering, SRM).
- Certifications:** NPTEL Java Programming, NPTEL Machine Learning, SAP Implementation Consultant - End-to-End Business Processes, INTEL Unnati Intel - Get Started With Generative AI.
- Competitive Coding:** Solved 70+ problems on HackerRank (C++/BASH), active participant on CodeChef.
- Languages:** English (Professional), Hindi (Native), Bengali (Native).
